1. Introduction

The **Orangecat Company** module for Magento 2 effectively bridging the gap between B2B functionality and standard Magento customer management. It allows for the creation and management of companies, assigning customers to these companies, and managing their specific attributes and addresses.

This manual covers the configuration, frontend user experience, administrative management, and API endpoints available within the module.

2. Configuration

The module settings can be found in the Magento Admin under **Stores > Configuration > Orangecat > Company**. Here you can configure general settings for the module behavior.

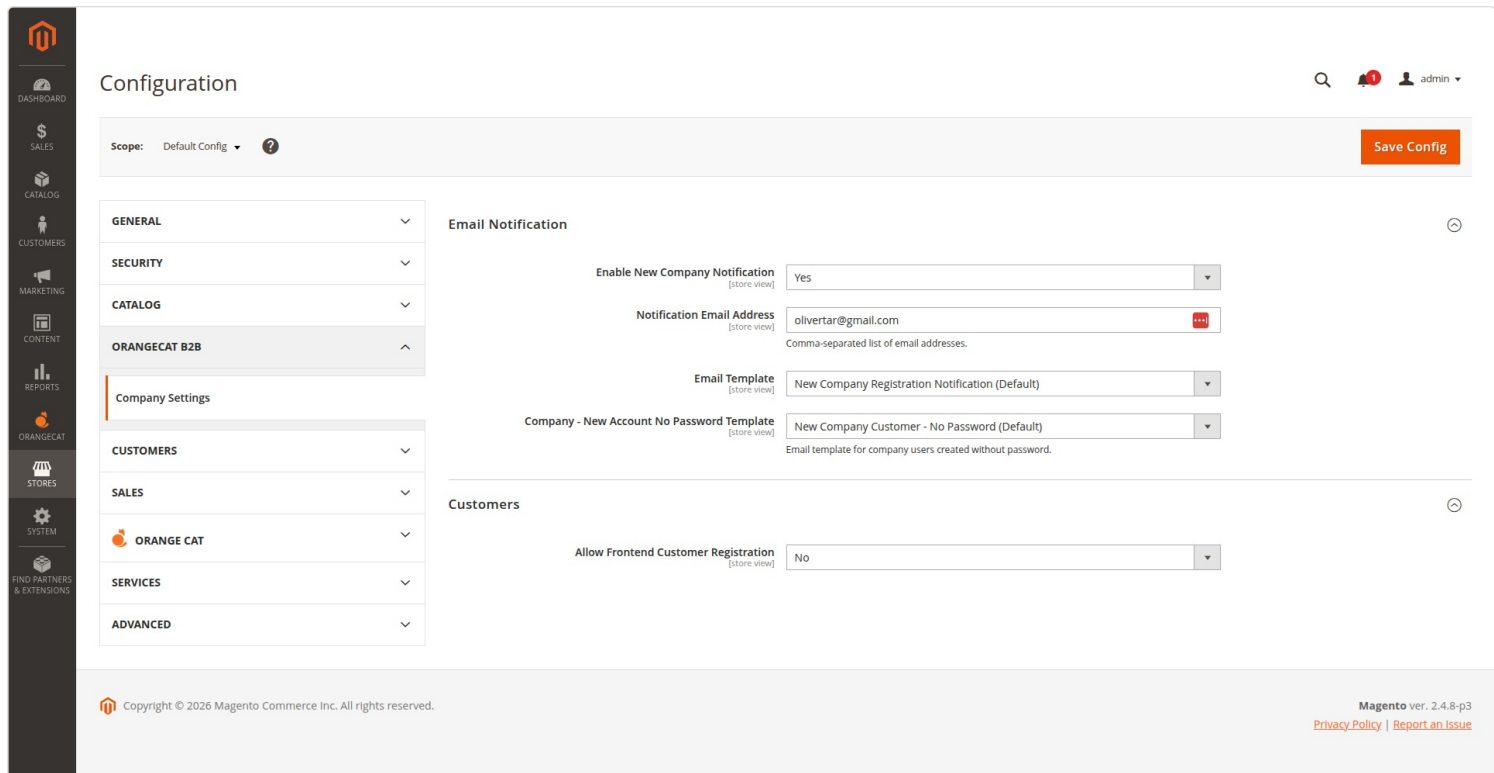

Figure 2.1: General Configuration Settings

3. Frontend Workflow

The module enhances the frontend user experience by allowing users to register their companies and manage their profiles.

3.1. Company Registration

Users can access the company registration form to sign up. This form collects necessary company details.

3.2. Registration Success

Upon successful submission, users receive a confirmation message.

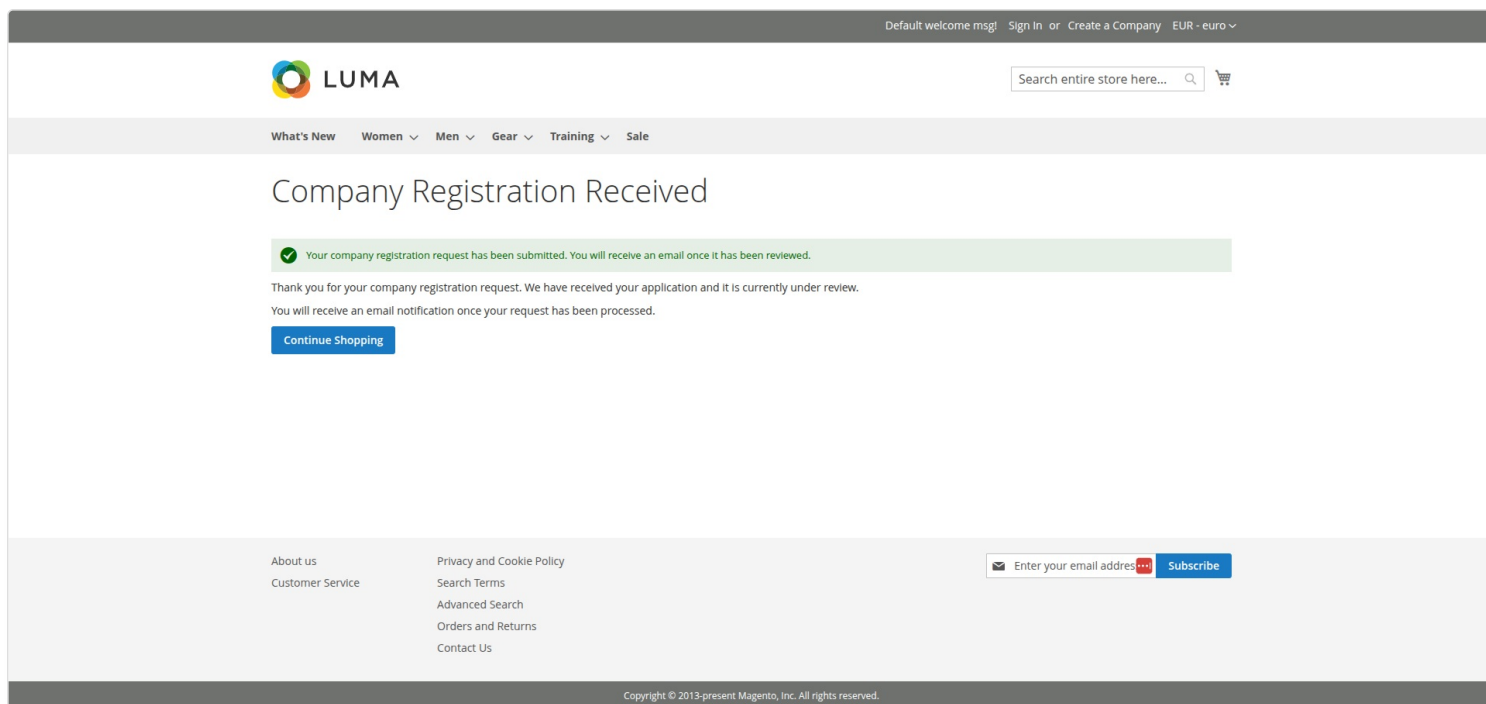

Figure 3.2: Successful Registration Message

3.3. Company User Management

Company administrators can manage users directly from the frontend.

Setting Password

Users added by the company administrator will need to set their password upon their first login or via the link sent to their email.

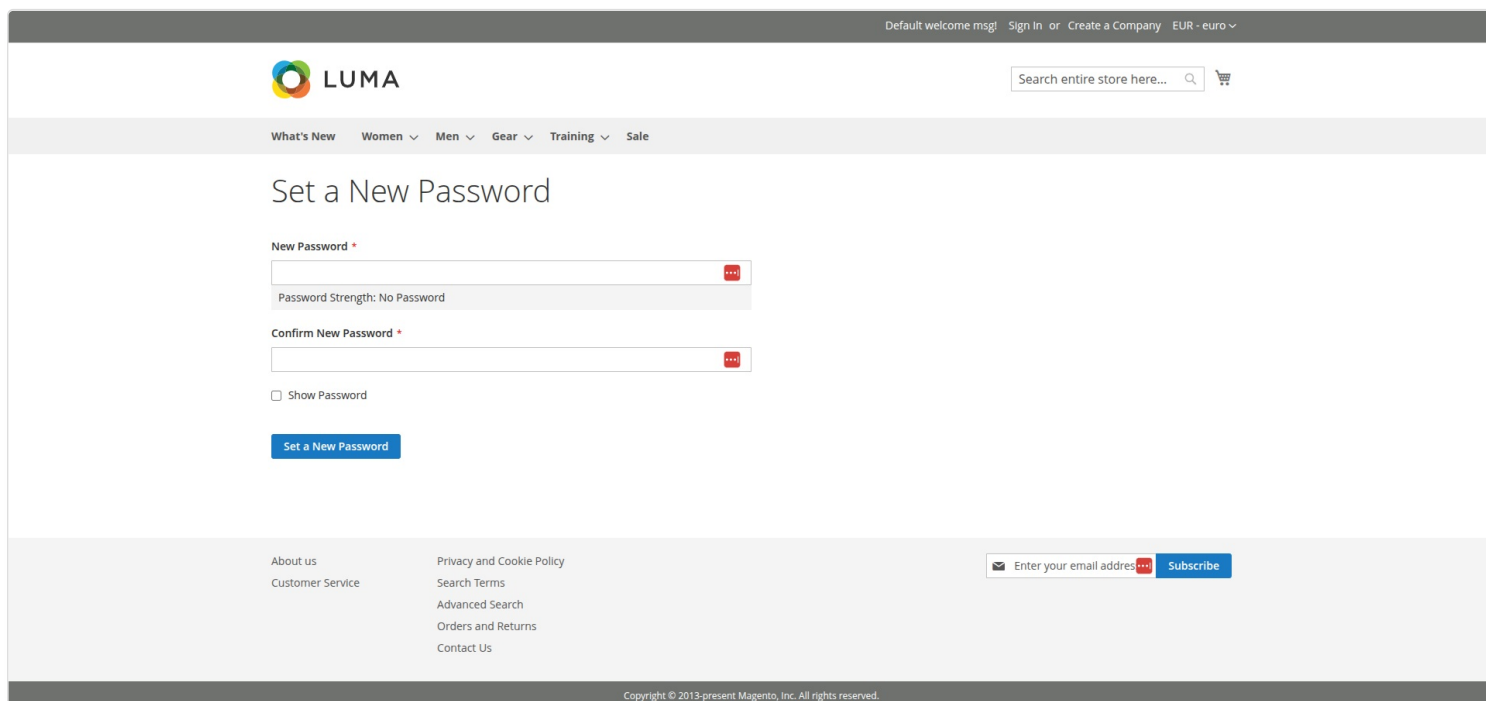

Figure 3.3: Set Password Screen

Login & Access Control

Access to the platform is controlled based on the company's status.

If a company is disabled by the administrator, users associated with that company will be restricted from logging in.

3.4. Email Notifications

The system sends automated emails to both administrators and customers during the registration process.

Email to Admin (New Registration)

Admins are notified when a new company registers.

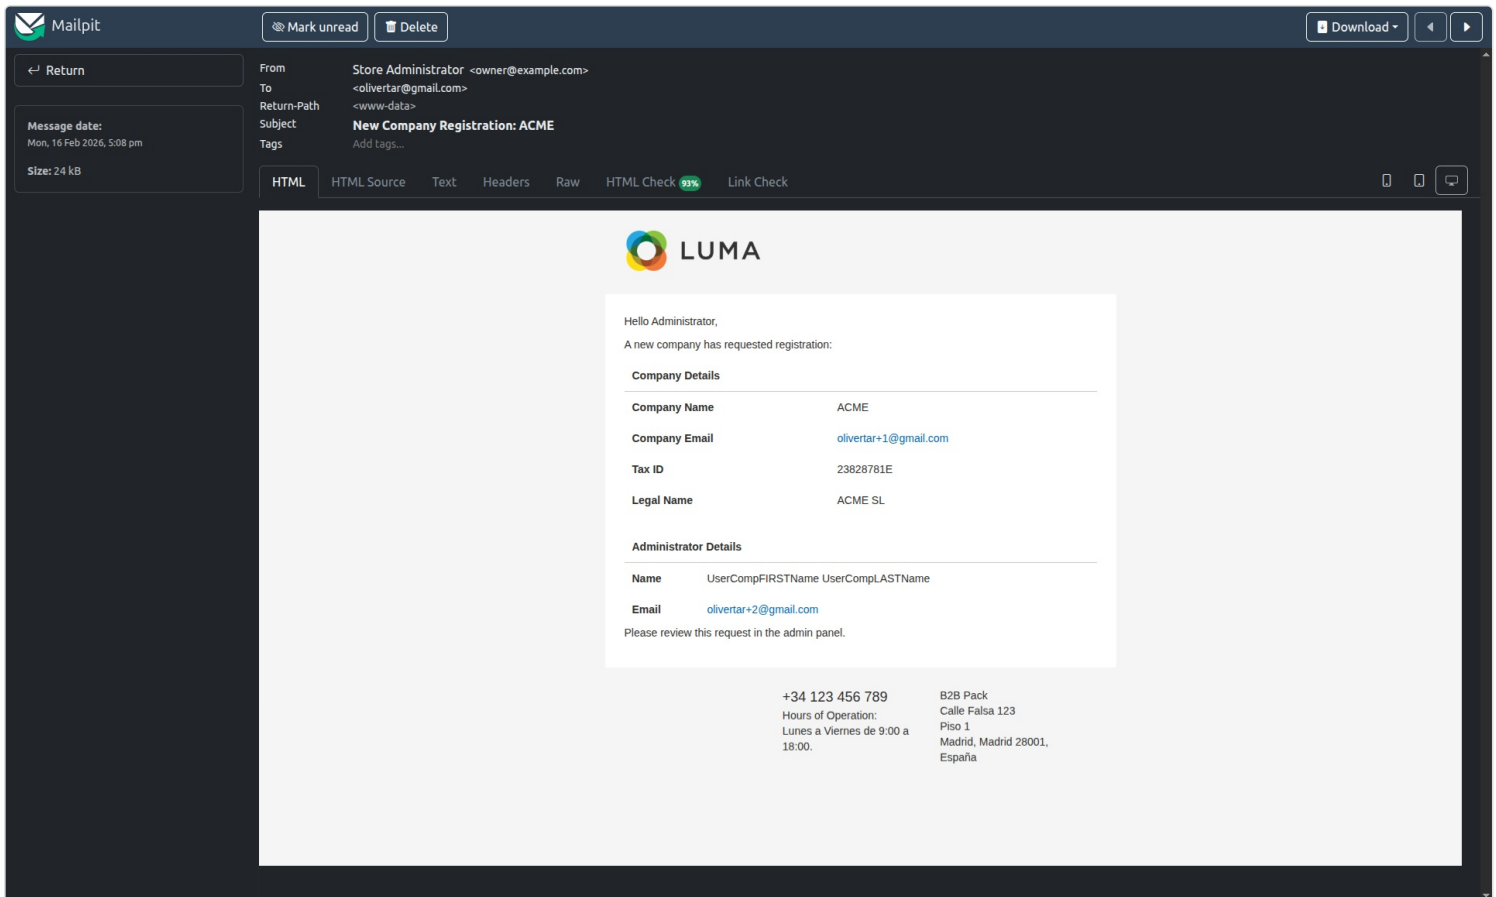

Figure 3.7: New Company Registration Notification for Admin

Email to User (Welcome)

Users receive a welcome email confirming their registration.

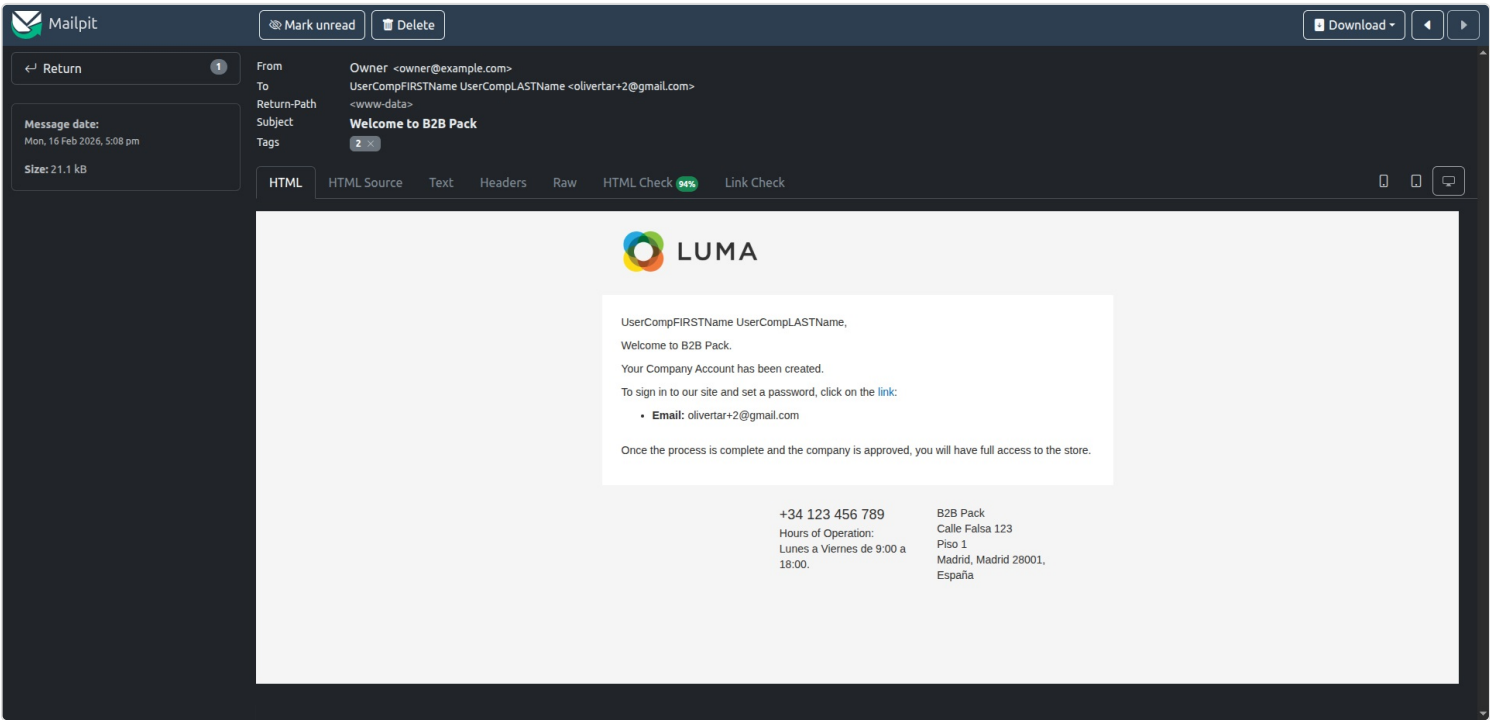

Figure 3.8: Welcome Email for User

Email to User (Added by Admin)

When a company administrator adds a new user, the user receives an email notification with instructions.

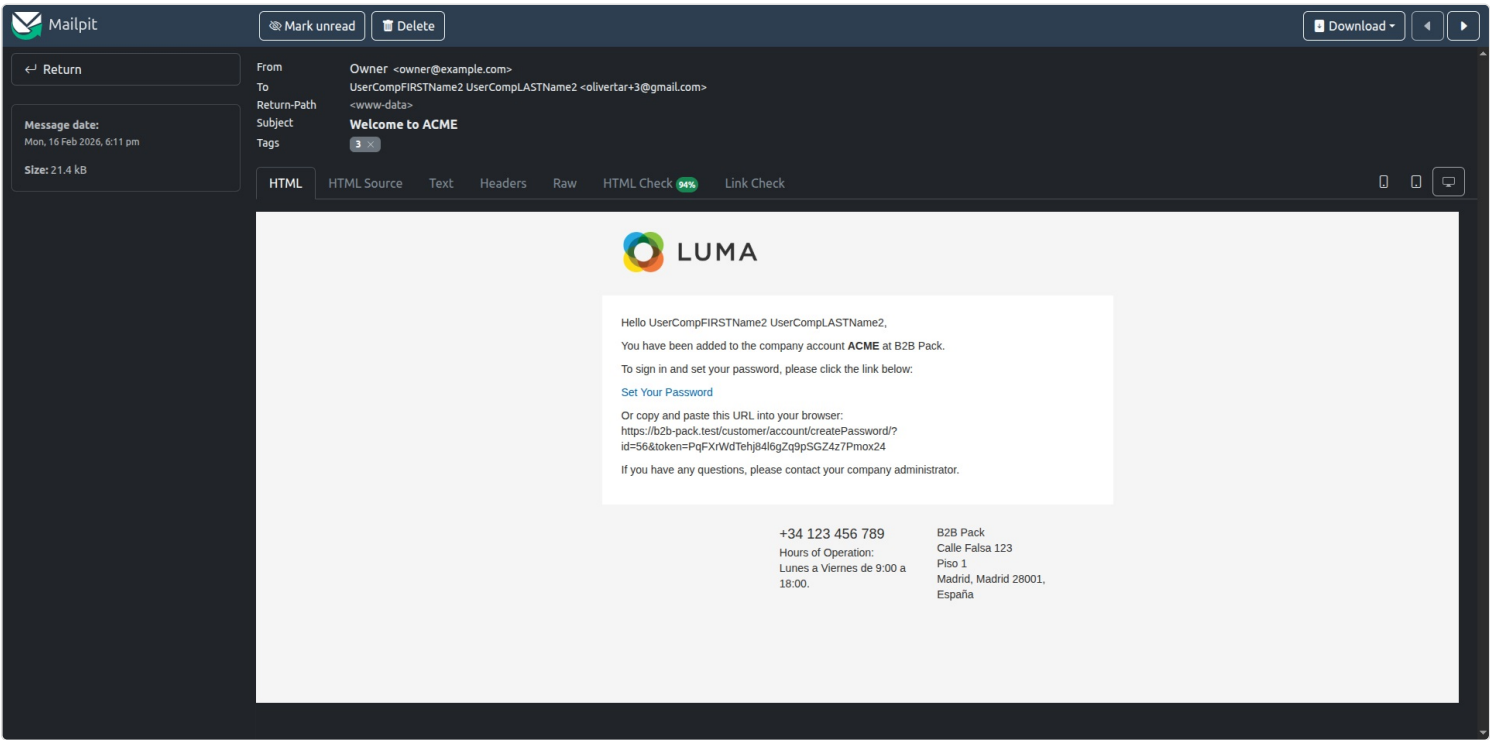

Figure 3.9: Email Notification for User Added by Company Admin

Email to User (Company Approved)

Users are notified when their company registration has been approved by the platform administrator.
